Education

ANKARA UNIVERSITY
Bachelor's degree, Computer Engineering   Sep 2020 – Expected Graduation: 2025

- Proficiency in programming languages including Typescript, C#, and JavaScript, underpinning a strong foundation in software development.
- Developed robust analytical and problem-solving skills through rigorous coursework and challenging projects.
- Demonstrated effective collaboration within diverse teams, fostering enhanced teamwork and communication abilities.

Professional Experience

AKGUN TECHNOLOGY
Full Stack Developer   Oct 2023 – Present
- Led the development of interactive, user-friendly web applications using the Angular framework, enhancing user experience for the Smoke Free Air Zone project.
- Conducted code reviews and provided constructive feedback to team members, promoting a collaborative and quality-focused development environment.
- Managed the ongoing maintenance and support of the Smoke Free Air Zone project, ensuring the stability, functionality, and security of web applications, and promptly addressing end-user issues and updates.
- Oversaw the REST API integration for call centers (184, 191, 171), supporting two mobile applications and a web platform.

TOUCAN CODE LABS
Full Stack Developer   June 2023 – Aug 2023
- Participated in the entire software development lifecycle, including requirement analysis, design, coding, testing, and deployment. Gained hands-on experience in executing real-world projects.
- Implemented responsive front-end designs using React, ensuring a seamless user experience across various devices and screen sizes. Developed a systematic approach to organize and document the requirements of the to-be-system.
- Developed RESTful APIs using .NET Core to facilitate efficient data communication between front-end and back-end systems.

MORYZONE
Full Stack Developer   Aug 2022 – June 2023
- Designed and developed dynamic web applications using Angular and React, focusing on intuitive user interfaces and efficient data management.
- Utilized Laravel and .NET Core frameworks to build scalable back-end systems, supporting seamless communication between front-end and databases.
- Collaborated with UI/UX designers to transform wireframes and mockups into fully functional web interfaces that aligned with user needs and business goals.

Technical Expertise

Angular, React, Typescript, .NET, Laravel, Umbraco CMS, Tailwind CSS, Bootstrap, MongoDB, React Native

Personal Projects

BeeRyder Rent: A car rental web application and a mobile application using React Native built with Angular and .NET.
E-Trade Demo: An e-commerce web app developed with Angular and .NET.
Spotify Clone: A Spotify web clone created with React and Next.js, utilizing Supabase, Stripe, and Tailwind CSS.
