Education

ANKARA UNIVERSITY

Bachelor's degree, Computer Engineering - GPA: 3.17

Sep 2020 – Jan 2025

- Proficiency in programming languages including **C**, **Python**, **C#**, and **JavaScript**, underpinning a strong foundation in software development.
- Developed robust analytical and problem-solving skills through rigorous coursework and challenging projects.
- Demonstrated effective collaboration within diverse teams, fostering enhanced teamwork and communication abilities.
- Completed a total of 42 projects, both individually and as part of a team, throughout my university studies

Professional Experience

AKGUN TECHNOLOGY

Full Stack Developer

Nov 2023 – Present

- Developed interactive, user-friendly front-end using the **Angular**.
- Participated in code reviews and provided constructive feedback to team members using **Gitlab**.
- Managed the ongoing maintenance and support of the “Dumansız Hava Sahası Denetim Sistemi” project.
- Managed the **REST API** integration for call centers (184, 191, 171).
- Supported two mobile applications and a web platform using **.Net Core** Backend.
- Developed detailed **MongoDB** scripts to support data analysis processes

KAPİTTA BİLİŞİM

Full Stack Developer

Aug 2023 – Nov 2023

- Performed maintenance and improvements for the KEYPS project, which supports 76 universities.
- Built the KEYPS YOTA mobile app with **Flutter** for students to follow lessons and check attendance.

TOUCAN CODE LABS

Full Stack Developer

June 2023 – Aug 2023

- Contributed to the development of the ELIT system within the ATLAS Project on aligning Turkey's transport legislation with the EU acquis.
- Developed responsive and native front-end designs using **React**.
- Developed **RESTful APIs** using **.NET Core** with domain based microservice infrastructure.

MORYZONE

Full Stack Developer

Aug 2022 – June 2023

- Designed and developed various dynamic web applications using **Angular** and **React**, focusing on intuitive user interfaces and efficient data management.
- Used **Laravel** and **.NET Core** frameworks to build scalable back-end systems.
- Collaborated with **UI/UX** designers to transform wireframes and mockups into fully functional web interfaces that aligned with user needs and business goals.
- Developed comprehensive web applications using **Umbraco CMS**.

Technical Expertise

Angular, React, Typescript, .NET, Tailwind CSS, Bootstrap, MongoDB, SQL, React Native, Flutter, Django, Git

Personal Projects

BeeRyder Rent: A car rental web application using Angular and a mobile application using React Native using shared .NET with Entity Framework.

E-Trade Demo: An e-commerce web app developed with Angular and .NET.

Spotify Clone: Spotify responsive web clone created with Next.js, Supabase for the database, Stripe for the payment system, and Tailwind CSS. Deployed on Vercell.

Polling Web App: Polling app that developed with Python's full-stack web framework Django.

Transaction App: Money transaction service that developed using GoLang and for visualization a simple React UI.

FlightControll App: A real-time flight tracking application inspired by FlightRadar24, built with Django, React, and React Native using WebSocket communication
